7G-8G	Enrichment Learn Ahead PARCC Exam Prep	9:00-10:30am (1.5Hr)	10:30-12:00pm (1.5Hrs)

Certified & Top Quality Teachers

These classes will cover the standard curriculum schools use for reading, writing and math to help students improve their performance in those subject areas. Students will learn skills that they will need in the future to make them comfortable with the material that later grades will cover. Many of the fundamentals necessary for future learning will also be reinforced during these classes. The material learned in students' current classes will be thoroughly reviewed, and students struggling with their classes will be able to catch up and have a better handle on the material. Through this program, students will have an edge in their current classes in school, and will be well prepared for the classes in years to come and state Exam.
